Hankscraft Inc. Achieves NSF International Nonfood Compounds Registration

Registration to NSF's Nonfood Compounds Program demonstrates that products have passed a stringent toxicology review and meet the requirements of an internationally recognized program

Reedsburg, WI – Hankscraft Inc. has received authorization from global public health organization NSF International to be listed in the NSF White Book™ through the NSF Nonfood Compounds Registration program, a voluntary registration program to verify the safety of products to be used in food and beverage processing. This authorization is for Hankscraft's handwashing and sanitizing products, RedDot Antibacterial Foaming Hand Soap (E2) and RedDot Fragrance-Free Foaming Hand Soap (E1).

To register a product in the NSF White Book™, the product receives a thorough toxicological review to ensure that the product meets the safety requirements for the category code that is appropriate for the products end use.

"By registering their products to the NSF Nonfood Compounds Program, Hankscraft has proven its commitment to public health and safety," said Ashlee Breitner, NSF International's Business Unit Manager for Nonfood Compounds. "NSF International's registration verifies that their products meet the category requirements and are therefore acceptable to be used in food processing facilities."

To view Hankscraft's official NSF listing for these products, please visit their official [NSF White Book™ listing](#).

"We are proud that we have achieved NSF approval on both our Fragrance-Free Foaming Hand Soap and our Antibacterial Foaming Hand Soap," said Andy Ahrens, Vice President & General Manager of RedDot Brands. "NSF is the go-to agency that facilities turn to for risk management solutions and we're very pleased to be aligned with their organization."

For more information on the details and requirements of the NSF Nonfood Compounds Registration Program, please visit [NSF International's website](#).

About Hankscraft, Inc. / RedDot Brands: Founded in Madison, Wisconsin in 1920, Hankscraft Inc. is privately held with over 300 employees worldwide who, guided by their mission and values, provide customers around the world with a wide range of products and services through five distinct divisions.

Hankscraft launched RedDot Brands in 2016 after identifying an industry need for enhanced branding and customization for distributors and end users in the Lodging, Foodservice, Commercial Building, Healthcare, Manufacturing, and Education markets. The product line is centered on a core offering of the most commonly used automated and mechanical dispenser products.

About NSF International: NSF International is a global independent organization that writes standards and protocols, and tests and certifies products for the food, water and consumer goods industries to minimize adverse health effects and protect the environment. Founded in 1944, NSF is a Pan American Health Organization/World Health Organization Collaborating Center on Food Safety, Water Quality and Indoor Environment.

The NSF Nonfood Compounds Program is an independent, third-party review that evaluates the safety of product formulations for use in food and beverage processing. Launched in 1999, NSF's registration program is based on previous USDA requirements outlined in the U.S. FDA 21, 9 and 40 CFR. The program addresses the toxicology, odor potential and intended use classification for a wide variety of products including laundry products, solvent cleaners, sewer and drain cleaners, hand care products and degreasers.
