

Automated Hands-Free Roll Towel Dispenser

RedDot automated roll towel dispensers are a great fit for those who want to offer a cost-effective, easy-to-use solution to their employees and customers. This feature-rich dispenser controls customer usage and can lower costs by up to 30% versus folded towels.

- High-capacity, 1000' towel rolls ensure less maintenance, fewer customer outages and significant waste reduction.
- This dispenser features a number of settings for flexible operator control. Choose your desired sheet length, dispense delay and sensor activation proximity. There is also a "hang" setting to allow a towel to hang from the dispenser at all times so it is ready for the next use.
- Four "D" cell batteries run the dispenser an average of one year in most high-volume settings.
- The dispenser's sleek, high-tech design can be customized to hold your logo, an organizational message, or both. It's a perfect fit for those that want a more contemporary look in their restroom or foodservice setting.
- RedDot Automated Hands-Free roll towel dispensers are compatible with all RedDot family roll towels. Choose from natural, white, or through air dried (TAD) white.

Standard Smoke with Vinyl Wrap

Water Transfer with Decal
